

# ABC checklist for visiting Costa Rica

**Swiss  
Travel  
COSTA RICA**  
*With the Accent on Service*

Costa Rica is waiting for you!

Vaccination is rolling out fast and robust health and safety protocols are still in place in our country, so you can enjoy safely all that Costa Rica has to offer.

These are the latest travel and requirement updates to visit our country.

Checklist you need to review before traveling:

## PASSPORT

Valid Passport (also, some specific countries require a valid Visa).

Return or exit tickets.

## HEALTH PASS

Complete digital health pass (found in this link <https://salud.go.cr>).

## NO INSURANCE

Currently Costa Rica is allowing entry without travel insurance to minors under 18 years of age and adult tourists fully vaccinated against COVID-19 with Moderna, Pfizer-BioNTech, AstraZeneca, and Johnson & Johnson vaccines. In the case of visitors from the United States, the "COVID-19 vaccination record card" will be accepted.

Unvaccinated adult visitors traveling to Costa Rica will continue to need to provide proof of a medical insurance policy to cover any COVID-19 related medical treatment or quarantine lodging while in Costa Rica. Policies can be purchased at the Juan Santamaría International Airport (SJO) and Daniel Oduber Quirós International Airport (LIR).

More info [here](#).

## Once you arrive to Costa Rica

Airport authorities will corroborate the special entry requirements before proceeding

to customs. Please check the general airport protocol for **SJO Airport** and **LIR Airport**. Once outside the airport, our team will be waiting to welcome you. For your convenience, while touring throughout Costa Rica, our staff and clients must follow our **Health and Safety Protocol**. Inquiry with us about our special conditions and flexible booking changes ([info@swisstravelcr.com](mailto:info@swisstravelcr.com)).

## Returning visitors

According to CDC guidelines, all air travelers (two years and older) returning to the United States of America, will require to provide a negative Covid-19 viral test (RT-PCR or antigen test). For more info, [click HERE](#).

To ease the process of return to all of our visitors, Costa Rican authorities have created a list of authorized laboratories for testing, with facilities in all Costa Rican territory.

Find this list [HERE](#).

Please check with the authorities from for any other special requirements.
